Computer Engineering: Ph.D. Dissertation Topics

2019 Dissertation Titles

- Enabling Virtual and Augmented Reality over Dense Wireless Networks, Principal Investigator (P.I): Konstantinos Psounis, Professor
- Effective Graph Representation and Vertex Classification with Machine Learning Techniques, P.I: C.-C. Jay Kuo, Professor

2017 Dissertation Titles

- Discrete Optimization for Supply Demand Matching in Smart Grids, P.I: Viktor Prasanna, Professor
- Efficient Memory Coherence and Consistency Support for Enabling Data Sharing in GPUs, P.I: Murali Annavaram, Professor
